- Certified Infrastructure Protection
- Introduction to CIP Academy
- Introduction to Critical Infrastructure Protection (ICIP)

### Other Certifications

- Threat Intelligence Analyst — arcX
- Vulnerability Manager Track — Fluid Attacks
- ISC2 Candidate — ISC2 (Mar 2025 – Jul 2025)

## PROFILE

Experienced Network Engineer & IT Security Specialist with proven expertise in designing, building, and securing complete enterprise networks from the ground up. Skilled in firewall configuration, network infrastructure setup, monitoring systems, and cybersecurity operations. Strong background in Fortigate firewall management, FS switch configuration, VPN, Omada AP, Zabbix, Grafana, MRTG monitoring, vulnerability scanning, and GRC compliance.

## WORK EXPERIENCE

### System and Network administration

Port City BPO – Colombo, Sri Lanka  
Dec 2024 – Present

- Lead the entire network team, overseeing design, deployment, and maintenance of the company's complete enterprise network infrastructure from the ground up.
- Fully led IT support operations, providing advanced troubleshooting and resolution for network and endpoint issues across the organization.
- Configured and optimized **FortiGate firewalls** (201F, 101F) for secure connectivity and traffic management.
- Managed FS switches with VLAN segmentation and uplink configurations.
- Installed, configured, and maintained **Omada access points** ensuring reliable Wi-Fi coverage.
- Deployed, configured, and maintained **Zabbix, Grafana, and MRTG** servers for real-time network monitoring and traffic analysis.
- Installed and managed **ESET Endpoint** Security across all endpoints, ensuring proactive threat detection and response.
- Set up and managed **Active Directory (AD) server**, including creation and management of user accounts, group policies, and server security policies.
- Created and maintained detailed configuration and operational **documentation** for network and security systems.
- Monitored and secured network traffic using **Seftica, Suricata**
- Administered VPN connections for secure remote access.
- Produced daily network performance and **security reports** for management review.
- Maintained **GRC documentation** and asset management for all IT infrastructure.

## SKILLS

### Network & Security Tools

- Fortigate Firewalls (201F, 101F)
- FS Switch ,CCTV Configuration
- Zabbix, Grafana, MRTG (Network Monitoring)
- Seftica, ESET Endpoint Security, Suricata

### Penetration Testing & Ethical Hacking Tools

- Nmap (Network Scanning)
- Metasploit Framework
- Netcat
- Burp Suite
- ZAP (OWASP Zed Attack Proxy)
- Ngrok (Secure Tunneling)

### Operating Systems & Platforms

- Kali Linux
- Parrot OS
- Hack The Box
- TryHackMe

### Additional Skills

- Vulnerability Scanning and Assessment
- Network Traffic Analysis
- VPN Configuration and Management
- Active Directory Setup and Management
- GRC Documentation and Compliance

### IT Assistant

Infodata – Colombo, Sri Lanka  
Jan 2022 – 2024 Nov
