Subject: Application for the Position of HSE Engineer

Dear Hiring Manager,

I am excited to apply for the HSE Engineer position. With a Bachelor of Science in Electrical Engineering and over 10 years of hands-on experience in HSE management, I have been actively involved in ensuring workplace safety and regulatory compliance across high-profile projects, including the Riyadh Metro, SEC substations, and SWCC industrial projects.

My technical skills include hazard identification, risk assessment, safety audits, environmental management, and emergency response planning. I have strong expertise in implementing ISO 45001 and ISO 14001 standards, conducting incident investigations, and delivering HSE training programs to workers and contractors. My certifications—NEBOSH-IGC, OTHM Level-7, OSHA, IOSH, and Lifting Supervisor (TUV SUD)—further strengthen my ability to ensure safe operations in challenging environments.

I am passionate about embedding safety practices at every project stage, from planning to execution, and ensuring compliance with both local and international standards. My proactive approach and problem-solving skills have enabled me to reduce risks, prevent incidents, and contribute to overall project success.

I would be delighted to bring my knowledge and experience as an HSE Engineer and support its commitment to employee safety and environmental sustainability. I look forward to the opportunity to discuss how I can add value to your projects.

Sincerely,
Engr. Abdur Rahman
